Illinois Public Hunting Areas Report

Illinois Department of Natural Resources
Public Lands - Hunting Effort and Harvest

2013 - 2014 Season
April 1, 2013 to March 31, 2014

*By Gary E. Potts and Connie Wieda-Stark
Division of Wildlife Resources*

Dr. James Herkert, Director
Office of Resource Conservation

John Buhnerkempe, Chief
Division of Wildlife Resources

August, 2014

PERMISSION TO QUOTE

Persons wishing to quote from this record or to use it in other forms should first obtain permission from the Project Leader or the Chief of the Division of Wildlife Resources – Illinois Department of Natural Resources.

Equal opportunity to participate in programs of the Illinois Department of Natural Resources (IDNR) and those funded by the U.S Fish and Wildlife Service and other agencies is available to all individuals regardless of race, sex, national origin, disability, age, religion or other non-merit factors. If you believe you have been discriminated against, contact the funding source's civil rights office and/or the Equal Employment Opportunity Officer, IDNR, One Natural Resources Way, Springfield, IL 62702-1271, 217/782-2662; TTY 217/782-9175.

This information may be provided in an alternative format if required. Contact the IDNR Clearinghouse at 217/782-7498 for assistance.

Illinois Public Hunting Areas Report – 2013 – 2014 Season

Abstract: The 2013-2014 hunting seasons opened on April 1, 2013 and ended March 31, 2014. The Illinois Department of Natural Resources (IDNR) managed 201 public hunting sites during this period. Various methods of data collection were used and information was recorded at 182 public land sites throughout Illinois. There are 19 additional sites that allow public hunting that currently have no facilities or resources available for on-site data collection. A multitude of factors may influence hunter use and harvest, including the severe winter we experienced in 2013-2014. Statewide 231,400 hunting trips resulted in 170,076 units of wildlife harvested on Illinois public lands. This equates to a hunter success ratio of 0.73 units of wildlife harvested per hunter trip. Hunting effort and harvest both decreased about 10%, respectively, compared to the 2012-13 hunting season. Mourning dove and waterfowl (duck) harvests can experience extreme harvest fluctuation annually due to liberal bag limits, habitat conditions and fall migration chronology. The 2013 mourning dove harvest increased by 95 birds and duck harvest decreased by 20,271 birds. Wildlife harvest increases (units in parentheses) were recorded for ring-necked pheasant (4,654) and geese (546). Harvest decreases are noted for squirrels (1,663), cottontail rabbit (95), bobwhite quail (207), eastern wild turkey (181), white-tailed deer firearm (518), white-tailed deer archery (43), raccoon (30) and a combination of 13 other species comprised primarily of furbearers and crow (629). The 2013-2014 trapping season marked the 2nd year in a row that river otters were trapped in Illinois with a total of 74 river otters harvested on statewide public lands.

ACKNOWLEDGMENTS

A special note of thanks goes to the many individuals who are responsible for providing information in this report. Site personnel operate check stations and perform other duties associated with collection of daily, weekly, monthly and annual hunting effort and harvest data. District wildlife biologists coordinate the data collection and summarize the final results. Other Illinois Department of Natural Resources (IDNR) administrative and field staff provide technical information and guidance in various ways. The efforts of IDNR staff results in a high quality long term data base that provides valuable information for wildlife management purposes.

INTRODUCTION

The *Illinois Public Hunting Areas Report* is developed each year to provide information on public hunting/trapping effort and wildlife harvest. This year's report provides both hunting and trapping information on 201 Illinois Department of Natural Resources (IDNR) owned, leased and managed public hunting sites.

Three tables (13, 14 and 15) contained in this report, provide specific information concerning the 2013-14 waterfowl season on 49 public land sites where waterfowl hunting is provided in Illinois.

The Federal Aid in Wildlife Restoration Program (resulting from the Pittman-Robertson Act of 1937 – a cost share program administered by the U.S. Fish & Wildlife Service) has either funded or is currently funding wildlife habitat developments, or has acquired land on 116 of the 182 public hunting and trapping areas. Pittman-Robertson (P-R) funding provides wildlife habitat development, maintenance activity, research projects and land acquisition for wildlife management purposes in Illinois. P-R funds also provide funding for Illinois hunter safety course administration and materials. The purpose of the P-R Act is to strengthen the ability of the States to preserve, protect and enhance wild animal and bird resources. Benefits include providing increased public enjoyment of these resources.

METHODS AND PROCEDURES

Methods:

*The principal methods used to document hunting/trapping effort and collect harvest data are through manned hunter check stations, permits issued from both the IDNR permit office and the individual site, annual registration and sign in/sign out boxes and through on-line registration and reporting. A majority of these methods have existed on a large number of Illinois public land sites since inception of the respective hunting and trapping programs. Hunter survey questionnaires are periodically used by a few waterfowl sites where limited staff and other complications result in limited or no consistent hunting or trapping data collection. Data is submitted by site staff either monthly or annually for district wildlife biologist summary tabulation. The IDNR **ILCHECK** telephone and on-line check-in systems are utilized for white-tailed deer and wild turkey, providing more detailed harvest information from an increased number of public land sites.*

Procedures:

Project personnel that collect hunting/trapping effort and harvest data for this report use four forms and/or the online harvest information.

- **Hunter Harvest Survey (Forms A & B)** – These surveys are completed on a daily basis by hunters during the respective hunting season. It lists such information as the user's name, address, date, hours hunted and species harvested. These forms are then compiled on a monthly basis for submission to the site's district wildlife biologist. Several different styles of waterfowl data collection sheets are used by various sites – the waterfowl summary for B is a representative sample used by waterfowl sites.
- **Monthly Hunter Harvest Summary (Form C)** – This form is utilized by site staff to compile monthly hunting effort and harvest data. The sites list their name, region, year and month the data is compiled. Hunter trips are recorded by species for dove, deer, wild turkey and squirrels. Waterfowl hunting sites use a modified version of this form that lists duck and goose species. Hunter trips for individuals pursuing upland game species; rabbit, quail, woodcock, pheasant and other species are usually grouped.
- **2013-2014 Hunting Effort and Harvest Report Summary – For Illinois Public Hunting Sites (Form D)** – This annual report form is compiled by each respective district wildlife biologist. The biologists tabulate each of the monthly report submissions (Form D), from April 1, 2013 through March 31, 2014, received from their public land sites. This form lists summary information that is used to compile the **2013-2014 Illinois Public Hunting Areas Report**.
- **Free Site Hunting Windshield Cards Online** – The online free hunting windshield card system was initiated in April of 2010 at Region 3 public hunting areas on a trial basis while developing the program for statewide implementation. The IDNR now uses the online free site hunting windshield card and harvest reporting system on many sites statewide. Go to <https://dnr.state.il.us/lands/landmgt/programs/windshieldcard/index.asp> to view the "Free Site Hunting Permits" system. **Inasmuch as the on-line windshield card system is relatively new, take care when comparing data with years prior to the adoption of this system.**

Daily Hunter Harvest Summary (FORM A)

Area: _____ Year: _____ Manned Check Station () Yes () No Sheet No. _____

HUNTERS PLEASE PROVIDE COMPLETE INFORMATION

Hunters Name / Address	Month Day	Hours Hunted	Dove	Squirrel	Rabbit	Pheasant	Quail	Deer Gun	Deer Bow	Other Species Number Harvest & Hours Hunted

1./ total waterfowl season hunter days

2./ includes harvest from early teal, youth duck hunt and 60 day duck hunting seasons

3./ includes harvest from early Giant Canada goose and regular Canada goose seasons

a./ includes data from designated youth hunting during regular duck season

b./ waterfowl data does not include the number of mallards, just total ducks. Due to the transition from one biologist to another.

Table 14. Teal harvest, hunter trips and success rate during the 16 day teal season in 2013.
