

DEFINITION OF A HUNTING INCIDENT

A hunting-related incident is defined as any occurrence when a person is injured during actual hunting activities.

Type A hunting-related incident is any incident that causes injury or death of any person(s) as a result of the discharge of a firearm or bow during actual hunting activities.

Type B hunting-related incident is any incident while hunting **not** involving the discharge of a firearm or bow which causes injury or death of any person(s).

Type C medical issues or injuries suffered while in the field, but not caused by the act of, or during, the hunting related activities.
