Note: This survey is intended to provide a general overview of water rates in the Lake Michigan water service area, and not to compare rates between water systems. Comparing rates can be misleading due to the many factors that are used in determining a water rate. The information presented herein is based on survey responses provided to the Department in the first half of calendar year 2010. The reader is cautioned that water rates change often and the information presented here may not include other customer charges.

Note: This survey is intended to provide a general overview of water rates in the Lake Michigan water service area, and not to compare rates between water systems. Comparing rates can be misleading due to the many factors that are used in determining a water rate. The information presented herein is based on survey responses provided to the Department in the first half of calendar year 2010. The reader is cautioned that water rates change often and the information presented here may not include other customer charges.
