**Subject: Grant Completion Report
Wildlife Preservation Fund Grant #02-008W**

Dear Deb:

In accordance with the Illinois Department of Natural Resources Wildlife Preservation Fund Grant # 02-008W, dated June 15, 2001 to Lake Bluff Open Lands Association (LBOLA) entitled; "Reseeding of Prairie Remnant - Lake Bluff Forest Preserve" to be used for in conjunction with LBOLA's "Open Lands Day" which concentrated on a native plant planting and re-seeding effort, we submit our report as detailed in the agreement. Per the reporting requirements specified in the grant agreement, please find enclosed six copies of this report and a completed pay request certification form.

In summary, this "Open Lands Day" appears by all accounts to have been a great success. LBOLA's Spring 2002 Newsletter was distributed throughout the village announcing our "Open Lands Day" activities which brought out approximately one dozen citizen volunteers. In addition to the newsletter, an article announcing award of the grant was published in the local paper, the "Lake Forester". (Copies of both announcements are included as Appendix A).

Aided by an additional one dozen Middle School students, volunteers "plugged" away at planting hundreds deep-rooted native grasses and forbs in the project area. (A location map has been provided in Appendix B). The project area has been a priority for LBOLA and preserve users alike after being identified as a worthy restoration candidate from a previous 1998 IDNR Small Project Program funded site inventory that was prepared by Dr. Wayne Schenum for the 80-acre Lake Bluff Forest preserve.

Prior to the planting and earlier this year, LBOLA in cooperation with the Lake County Forest Preserve District (LCFPD) and U.S. Fish & Wildlife Service, had expanded the prairie remnant with a local landscaping contractor who cut and removed the non-native buckthorn and honeysuckle thicket that was encroaching on the area. Earlier in the spring, locally supplied prairie seed from the LCFPD was sown into the project area.

The plants were sited into the previously cleared areas, as native vegetation was lacking due to the dense non-native canopy that formerly shaded the bare ground. After the plugs had been planted, a cover crop of eight pounds of Canada Wild Rye was sowed into the project area to hopefully suppress weeds from overtaking the area and provide fuel for a future prescribed burn. Throughout the morning, volunteers were offered food and refreshments as we sensed that our efforts had made a significant improvement in the effort to expand and preserve the prairie remnant. Photographs from "Open Lands Day" are also included as Appendix C with this report.

Listed below is the cumulative line item budget detailing the various expenses and use of grant money.

<i>Expense Description</i>	<i>LBOLA expense</i>
<u>Commodities</u>	
Natural Garden Plant materials	\$1,114.73
Prairie Nursery seed	\$136.00
Hild & Associates	\$240.00
<u>Other</u>	
Volunteer Hospitality	\$25-30 (no receipts available)

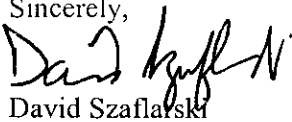

Labor
All labor supplied was volunteer

Total	\$1,515.73	<u>Original projected project cost was \$1,400.00</u>
-------	------------	---

Illinois Wildlife Preservation
Funds Requested \$650.00
LBOLA Funds Provided \$865.73
Copies of invoices have been included as Appendix D.

If you need any additional information concerning the above listed expenditures our records are fully available for your review. Please do not hesitate to call us at the telephone number listed on our letterhead. On behalf of LBOLA, we greatly appreciate this grant award from the IDNR as it went a long way in helping to supplement our local restoration efforts in and around our community. Thanks for your support for this successful restoration effort.

Sincerely,

David Szaflarski
Treasurer & Land Manager

Matching grant given to LBOLA

Lake Bluff Open Lands Association (LBOLA) is pleased to announce the award of a matching grant from the Illinois Department of Natural Resources, IDNR Small Grants Program for the restoration of the 'Birch Prairie' located in the eastern most corner of the Lake County Forest Preserve's Lake Bluff Preserve.

The Lake Bluff Preserve, an 80 acre site including ancient bur oak forest, wetlands, prairie and a man-made lake designed by renowned turn of the century landscape architect Jens Jenson, straddles the

Lake Forest / Lake Bluff border between Green Bay Road and the Skokie River.

During a previous IDNR funded site inventory of the Lake Bluff Preserve, the Birch Prairie was identified by local naturalist Dr. Wayne Schennum as a rare native prairie remnant.

In cooperation with the Lake County Forest Preserve, funding from this IDNR grant will be used to reseed and transplant native wildflowers and grasses in areas of the Birch Prairie where LBOLA's recent volunteer restoration efforts have concentrated.

SPRING 2002 NEWSLETTER

LBOLA Warline 735-8137

President's Message

It has been another eventful winter in the LBOLA preserves. Winter is the time for us to take advantage of both frozen ground and the dormancy of our native plants to make major inroads into the clearing of brush so that our 'open' lands can become and remain that way.

One of our most visible projects to date, as well as the most dramatic restorations we've been involved with occurred at **Central School** where, over the span of just two Saturday workdays, some 50 volunteers contributed clearing of non-native, invasive brush from the woods to the south of the School. **Cathy** and the workers prior to this worked with **Super Mike Sullivan** and **Cathy**...

2002 Open Lands Day To Be Held At The Birch Prairie

This year's Open Lands Day will be May 4th and will be held at the Birch Prairie which is part of our Lake County Forest Preserve property. We'll plan to meet at 9:00 AM in the western-most portion of the Harrison Conference Center parking lot. Once assembled, we'll take a short hike to the newly expanded Birch Prairie where we'll plant over 1000 native grasses and forbs (wildflowers) to enhance the newly cleared portions of this birch-lined ancient prairie remnant.

As in previous years, Open Lands Day will be a special science project for Waller Caldwell's L.B. 8th graders, however family participation is most warmly welcomed.

Spring Birdwalk At Skokie Preserve

Again this year, our Spring Birdwalk will be led by Jeff Sundburg, Cliff Miller and Jim Steffan and held at the Skokie Preserve. Last year we were impressed with the Skokie's variety of birds and the change of scenery. Please note that, due to parking difficulties at JAWA, this event will begin at the western-most parking lot at the **Harrison Conference Center**. And never fear - our birdwalk, scheduled for September 14th will be back at Crab Tree Farm.

1) All shipping dates shown on orders are approximate. We will do everything in our power to meet your requested date, but because growing conditions are unpredictable, we ask that you have patience when we are unable to ship precisely when expected. We accept all orders and deposits subject to growing conditions, and we reserve the right to cancel and refund a portion of the order, or all thereof, should injury befall our stock from weather conditions, insect and disease injury, seed viability or other causes beyond our control.

2) We are careful to keep our varieties true to name and will replace, at our option, any portion of the stock that may prove otherwise, or refund the price paid for such portions. The maximum damages the purchaser is entitled to will not exceed the price paid for such portions. We will not be responsible for any other expenses, losses or inconvenience which the purchaser may sustain as a result thereof.

3) All carriers are liable for transit damage. Stock is guaranteed to be in good living condition when shipped. We cannot be held responsible for stock lost by causes over which we have no control.
