LAND RECLAMATION DIVISION MEMORANDUM NO. 85-5

TO: ALL SURFACE MINE COAL OPERATORS
FROM: Douglas Downing, Supervisor
Land Reclamation Division
DATE: August 23, 1985
SUBJECT: Reporting of Affected Acreage

Enclosed please find copies of the revised affected acreage reporting forms (SCML-3) for fiscal year 1985. The three major categories for reporting affected acreage are the same as last year; however please note that the reaffected land designation has been revised to include a reaffected acre summary. The definition of each category is located on the back of the SCML-3 form. As in previous years, a detailed map of the affected acreage is required. For those mines which are currently operating under an interim permit, pending issuance of a permanent program permit, the FY 85 affected acreage must be reported under the applicable interim permit(s). For those mines which had a permanent program permit issued during fiscal year 1985, all FY 85 affected acreage must be reported under the permanent program permit. If there was no affected acreage for FY 85, an SCML-3 for zero (0) acres must still be filed with the county clerk's office and the Division.

The SCML-3 and map are to be filed with the County Clerk for each surface mining permit in effect from July 1, 1984 through June 30, 1985. At the time of filing the SCML-3, please have the County Clerk sign and seal the form 3a (copies enclosed) for each SCML-3 submitted. Please submit the completed form 3a to this office along with three copies of the SCML-3 and three copies of the map(s).

Due to the implementation of a revised form and reporting system, the deadline for submission of the affected acreage reports has been extended until October 1, 1985.

Should you have any questions concerning the reporting of affected acreage, please do not hesitate to contact your field representative or this office.

 DETAILED MAP(S) OF AREA AFFECTED

(To be submitted by September 1, following end of fiscal year
 for the period of July 1, through June 30.)

Date: _____

_____ hereby submits the
 (Name of corporation, firm, individual)
 attached map(s) of the actual area affected under Permit Number _____ for the
 fiscal year from July 1, 19____ through June 30, 19____.

Name of Mine	Pit or Facility Name or No.	*(1)Surface Affected Area	*(2)Mined Overburden	*(3)Soil Removal Only

If the above affected acreage includes reaffected land which has been previously disturbed by mining or surface affected area (reaffected), complete the appropriate section on the reverse side and identify on attached map(s). Soil removal only areas which were later mined are not considered reaffected.

*See back of form for more detailed instructions.

 (Signature of Company Official)

Address: _____

Form SCML-3 and a detailed map showing the area affected are to be submitted to the county clerk of the county in which the mining occurred. Receipt of filing is required (Form -3a) and is to be forwarded to the Land Reclamation Division, Department of Mines and Minerals, along with the three copies of SCML-3 and map(s).

NOTICE - This state agency is requesting disclosure of information that is necessary to accomplish the statutory purpose as outlined under Ill. Rev. Stat., Ch. 96-1/2, 4501 et.seq. Disclosure of this information is MANDATORY. Failure to provide this information could result in the issuance of notices of violation and ultimately bond forfeiture. This form has been approved by the Forms Management Center.

Mined Overburden

Areas to be included in this category include all land from which overburden has been removed and all areas where overburden has been deposited (e.g., boxcut). Highwall and pit area extending to the top of the highwall are to be included.

Surface Affected Area

This area includes all surface areas either disturbed, affected or used in support of, or ancillary to, mining operations activities. Roads, tipple, ditches, sediment control facilities, waste disposal, soil stockpile, and storage areas are included; however, it may be necessary to include other areas also. Once an area is reported as surface affected area, it need not be reported again. In subsequent years, only newly affected areas will be mapped to show the initial year the surface was affected.

Areas extending laterally (out to the side of the direction of pit advance) which have been disturbed by surface soil removal and/or other soil removal but will not be subjected to overburden removal, must be declared under the surface affected area category.

Those areas affected in advance of the highwall that have experienced only surface soil or root medium removal and will not be mined (not to experience overburden removal) must be mapped and the acreage included in this category.

This category also includes those operations having surface mining activities which recover coal from a deposit that is not in its original geologic location such as coal waste disposal areas (i.e., carbon recovery operations).

As a result of repermitting, areas which have been declared mined overburden in previous permits but have been actively used as a support area (e.g., incline, soil storage area) are to be included in this major category. Surface affected areas such as this which are declared reaffected after repermitting must be categorized under their original affected acreage classification under the reaffected section of this form.

Soil Removal Only

This category includes all areas from which only surface soil and/or root medium has been removed or stockpiled or other disturbed areas (i.e., ditches, roads) that will be mined at a later date.

Reaffected Acreage

- A. _____ acres. Acreage remined. (If known, please state when and by whom the acreage was mined initially.)
- B. _____ acres. Carbon recovery operations on previously reported disturbed acreage. (If known, please specify when and by whom the acreage was initially disturbed.)
- C. _____ acres. Acreage which has been previously declared affected acreage under another permit.

Form SCML-3 and a detailed map showing the area affected are to be submitted to the county clerk of the county in which the mining occurred. Receipt of filing is required (Form -3a) and is to be forwarded to the Land Reclamation Division, Department of Mines and Minerals, along with the three copies of SCML-3 and map(s).

NOTICE - This state agency is requesting disclosure of information that is necessary to accomplish the statutory purpose as outlined under Ill. Rev. Stat., Ch. 96-1/2, 4501 et.seq. Disclosure of this information is MANDATORY. Failure to provide this information could result in the issuance of notices of violation and ultimately bond forfeiture. This form has been approved by the Forms Management Center.

Mined Overburden

Areas to be included in this category include all land from which overburden has been removed and all areas where overburden has been deposited (e.g., boxcut). Highwall and pit area extending to the top of the highwall are to be included.

Surface Affected Area

This area includes all surface areas either disturbed, affected or used in support of, or ancillary to, mining operations activities. Roads, tipple, ditches, sediment control facilities, waste disposal, soil stockpile, and storage areas are included; however, it may be necessary to include other areas also. Once an area is reported as surface affected area, it need not be reported again. In subsequent years, only newly affected areas will be mapped to show the initial year the surface was affected.

Areas extending laterally (out to the side of the direction of pit advance) which have been disturbed by surface soil removal and/or other soil removal but will not be subjected to overburden removal, must be declared under the surface affected area category.

Those areas affected in advance of the highwall that have experienced only surface soil or root medium removal and will not be mined (not to experience overburden removal) must be mapped and the acreage included in this category.

This category also includes those operations having surface mining activities which recover coal from a deposit that is not in its original geologic location such as coal waste disposal areas (i.e., carbon recovery operations).

As a result of repermitting, areas which have been declared mined overburden in previous permits but have been actively used as a support area (e.g., incline, soil storage area) are to be included in this major category. Surface affected areas such as this which are declared reaffected after repermitting must be categorized under their original affected acreage classification under the reaffected section of this form.

Soil Removal Only

This category includes all areas from which only surface soil and/or root medium has been removed or stockpiled or other disturbed areas (i.e., ditches, roads) that will be mined at a later date.

Reaffected Acreage

- A. _____ acres. Acreage remined. (If known, please state when and by whom the acreage was mined initially.)
- B. _____ acres. Carbon recovery operations on previously reported disturbed acreage. (If known, please specify when and by whom the acreage was initially disturbed.)
- C. _____ acres. Acreage which has been previously declared affected acreage under another permit.
