

PART II

PREMINING INFORMATION

Premining information is to be displayed on premining land use map unless otherwise indicated.

- 1) Describe how the permit area perimeter will be marked and discuss the method or system employed to locate permit area perimeter and set markers along it. Designate a reference point outside the permit area. Provide a description of the reference point and a sketch relating the reference point to the permit area perimeter.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 2) Provide slope measurements to represent existing land surface configuration of proposed permit area. A soils map of medium intensity prepared to NRCS specifications or a contoured aerial photo may be submitted to meet this requirement.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 3) A) Has previous mining activity occurred within the permit area and/or adjacent areas?

Yes X No _____

If yes, provide the following information, if available:

- 1) Type of mining, surface, underground, or both?

RESPONSE: *Underground*

- 2) What coal seam or other mineral(s) were extracted?

RESPONSE: *Herrin No. 6 Seam*

- 3) What was the extent of coal or other mineral(s) removed? Delineate on the pre-mining land use map, or other designated map, the areas disturbed by previous mining activities, including active, inactive or abandoned underground mine work along with any mine opening to the surface.

Identify for each area, the type of mining and the approximate date of extraction.

RESPONSE: *Refer to Attachment II.3 – Previous Mining Within and Adjacent to Permit Area for a listing of all coal mines within the proposed shadow area and adjacent areas, including the type of mining, and approximate date of operation. Refer to Map 3 – Pre-mining Land Use Map included in this revision application for the location of the underground mines located adjacent to the Deer Run Mine.*

- 4) Identify on all maps submitted with the application areas where surface coal mining operations were conducted prior to August 3, 1977; after August 3, 1977 and prior to May 3, 1978; after May 3, 1978 and prior to February 1, 1983; and any permanent regulatory program permit issued after February 1, 1983.

RESPONSE: *There are no other surface coal mining operations adjacent to the permit area.*

- 5) Identify the land uses preceding mining.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 4) Give the acreage of each land use within the proposed permit area, employing land use categories of Section 1701.5 listed below, and delineate on premining land use map existing land uses in the proposed permit area and within 1,000 feet adjacent to it. Include on the premining land use map the location of all buildings and identify the current use of these buildings.

Cropland
Pasture land
Grazing land
Forestry
Residential
Industrial/Commercial
Recreation
Fish and Wildlife Habitat
Developed Water Resources
Undeveloped land or no current use or land management

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 5) Have any of the land uses changed within the last five years?
Yes _____ No X

If yes, indicate the acreage and changes of land uses.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 6) A) Provide a narrative of land capability and productivity of the proposed permit area prior to mining which shall provide an analysis of:
- 1) The capability of the land to support a variety of uses, giving consideration to soil and foundation characteristics, topography, vegetative cover and hydrology.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 2) The productivity of the total area expressed as average yield of food, fiber, forage, or wood products under high level management.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- B) Where the narrative of land capability and productivity employs the U.S.D.A Natural Resources Conservation Service (NRCS) Land-Capability Classification (Agriculture Handbook No. 210) in conjunction with the soil information provided under Part II 12) of this part, soil interpretation sheets or published soil survey or complete soil information chart for productivity from Circular 1156 are to be submitted for each soil type occurring in the permit area.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 7) Provide a description of the existing land uses and land classifications under local law, if any, for the proposed permit and adjacent areas.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 8) Provide fish and wildlife resource information for the proposed permit area and any adjacent areas. Prior to initiation of studies to obtain fish and wildlife resource information, the applicant must contact the Department for a determination of what fish and wildlife resources information will be required. Pursuant to 62 Ill. Adm. Code 1784.21(a)(1) and (2), the Department will determine the level of detail and the areas of study. Site-specific resource information will be required by the Department if either the permit area or adjacent area is likely to include threatened or endangered species or their critical habitats or habitats of unusually high value for fish and wildlife.

The applicant should complete the description of plant communities within the permit area and adjacent area, requested in Part II 9), below, prior to contacting the Department for a determination of the fish and wildlife resource information.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 9) Give a description of the plant communities within the proposed permit area and delineate on a vegetation map the vegetative types occurring within the proposed permit area and within any proposed reference area. Where a map or aerial photograph is required, provide coverage of sufficient adjacent areas to allow evaluation of vegetation as important habitat for fish and wildlife for those species of fish and wildlife identified under Section 1784.21. The description shall include information adequate to predict the potential for reestablishing vegetation.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- 10) A) Pursuant to 62 Ill. Adm. Code 1783.12(a), provide a description of the cultural, archeological and historic resources listed or eligible for listing on the National Register of Historic Places and any known archeological features within the proposed permit, adjacent areas, and shadow area (for planned subsidence). The description of the cultural, historic and archeological resources occurring within the permit area and adjacent areas shall be based upon available data, including data of State and local archeological, historical and cultural preservation agencies.

RESPONSE: *A program to identify standing structures within the proposed shadow areas subject to longwall mining that may be eligible for inclusion in the National Register of Historic Places will begin in advance of longwall mining.*

The program will be structured to identify all standing structures within the proposed shadow areas subject to longwall mining. The identification will start immediately in the shadow area that has not been previously inventoried.

Prior to longwall mining occurring in an area, a canvas of the structures will be made to identify the type of construction and the general age of the structure. Two categories will be created. The first will be for more modern structures that would not be considered for listing in the National Register of Historic Places. The second category would list the structures that are older, and their construction may indicate that the structure is significant and should be documented.

The listings would be provided to the Department for review. From this review, the Applicant would seek to perform a more detailed study of identified structures and ascertain the history of the structure and document the

construction methods used. Documentation could be in the form of photographs and/or line drawings.

Information for the proposed Shadow Boundary Area has been reviewed by Mr. Hal Hassen, IDNR Cultural Resources Coordinator, and Ms. Dawn Cobb, IDNR Office of Realty and Environmental Planning. A total of four structures were identified as needing additional documentation if the Applicant elects to demolish in the future. Should the applicant intend to demolish these structures, approval will be obtained from the Department prior to demolition. Location of the structures are identified on Map 2, as well as highlighted on Attachment II.10.A. Refer to Attachment II.10.A.2 – IDNR Identified Structures for documentation.

Refer to Map 2 - Identification of Interests for the location of all structures within the proposed shadow boundary area. Refer to Attachment II.10.A – Identification of Structures for a listing of all structures currently within the proposed shadow boundary area.

- B) 1) Pursuant to 62 Ill. Adm. Code 1783.12(b):
- a) State whether there is a substantial likelihood of currently unknown resources which would be eligible for the National Register of Historic places within the proposed permit, or adjacent areas or shadow area (for planned subsidence).

RESPONSE: *N/A. Other than the structures referenced in Attachment II.10.A.2 – IDNR Identified Structures, it is unlikely that any other unknown resources exist within the Revision No. 2 Shadow Area.*

- b) Provide a plan detailing the manner in which additional information will be gathered by the applicant to enable the Department to identify and evaluate such resources.

RESPONSE: *N/A.*

- 2) Please Note: If the Department determines that the Part II 10) A) resource information is not adequate to make the required finding under 62 Ill. Adm. Code 1773.15(c)(12) because information available to the Department indicates a substantial likelihood of currently unknown resources within the permit area or adjacent areas which would be eligible for the National Register of Historic Places, the Department will require the applicant to submit additional information to enable the Department to identify and evaluate the potential resources. Such information might include the results of field investigations of the permit area and adjacent area if it is determined by the Department, in consultation with the Illinois

State Historic Preservation Agency, that the field investigation will provide the information required under Part II 10)A).

RESPONSE: N/A.

- C) For the permit area and/or shadow area (for planned subsidence), locate on the vegetation map or the land use map the following:

The boundaries of any publicly owned parks, locations of any cultural resources, historical resources listed or eligible for listing on the National Register of Historic Places.

RESPONSE: *The Cranfill Unit of the Coffeen Lake Fish and Wildlife Area is a public park based on the definition for public parks in the permit regulations. There are no known locations of any cultural resources, historical resources listed or eligible for listing on the National Register of Historic Place known to be within the proposed shadow area.*

- D) Provide a map showing the location of known/Archeological site(s) listed on or eligible for listing on the National Register of Historic Places. Provide identifying field markings to be employed to insure that the site(s) will not be disturbed by surface coal mining and reclamation operations. The map is to be submitted in separate cover from the rest of the application. The Department will hold the map as a confidential document.

RESPONSE: *N/A. There are no known Archeological site(s) listed on or eligible for listing on the National Register of Historic Places within the proposed shadow area.*

Archeology surveys shall be performed prior to longwall mining of individual panels of projected areas of inundation due to subsidence along Coffeen Lake. The survey areas shall extend from the pre-mine shoreline to 100 feet beyond the predicted post subsided shoreline shown on Map 8c, Post Subsidence Coffeen Lake.

- E) Provide a plan for publicly owned park(s), or place(s) identified above in paragraph(c) that may be adversely affected by the proposed operation describing the measures to be employed:

RESPONSE: *The Cranfill Unit of the Coffeen Lake Fish and Wildlife Area is a public park based on the definition for public parks in the permit regulations. Minimal subsidence is planned within this area; however, the subsidence is not anticipated to create adverse impacts as the public park land is for recreational hunting purposes. Mitigation shall occur to restore proper drainage to these areas.*

- 1) To prevent adverse impacts caused by underground mining related activities including, but not limited to, loss or destruction of historic artifacts and damage to historic structures or property; or

RESPONSE: N/A.

- 2) If valid existing rights exist or joint agency approval is to be obtained under 62 Ill. Adm. Code 1761.12(e), to minimize adverse impacts.

RESPONSE: N/A.

- 11) For the permit area and/or shadow area (for planned subsidence) locate on the vegetation map or land use map the boundaries of any public or private cemeteries or Indian burial grounds.

RESPONSE: *The locations of public and private cemeteries are shown on Map 2 - Identification of Interests. There are no known Indian burial grounds.*

- 12) A) Provide the location of surface and subsurface man-made features within, passing through, or passing over the proposed permit and shadow areas on the pre-mining land use map or other designated map.

Such features should include but are not limited to major electric transmission lines, pipelines, agricultural drainage tile fields, gas and oil wells, and water wells. For gas, oil and water wells provide the depth, if available, of the well.

RESPONSE: *Refer to Map 3 – Pre-mining Land Use Map for the respective information.*

Existing field drainage tiles are not shown on the maps, but the following discussion details how drainage tiles will be dealt with.

Prior to subsidence in the Shadow Area visual inspections and/or discussions with landowners and tenant farmers will be used to determine drainage tile installations. If subsidence damages drainage tiles, these tiles will be repaired, replaced, or rerouted as necessary to maintain drainage in farming and crop areas, and non-crop areas.

In areas where no drainage tiles are currently installed, but subsidence profiles change drainage such that the installation of tile is determined as the method to correct areas where water pools. Drainage tiles will be installed to return the land to its premining capability.

See Attachment II.12 – Oil & Gas Wells for status of the 10 oil & gas wells depicted on Map 4 – Hydro-Geological Map. ISGS status of the wells within the shadow area are noted as dry and abandoned with exception of well #73. No record was found in the ISGS Oil & Gas Database for #73 at the location shown on the map. Prior to mining through an abandoned well, MSHA 101-C

form will be filed to verify that the well has been properly sealed. ISGS records note that Wells #78 & #23 were partially plugged and converted to water wells.

- B) Provide the elevation and location of all monitoring stations used to gather data for water quality and quantity, fish and wildlife, and air in preparation of the application.

RESPONSE: N/A.

13) Soils Information Map

- A) Does the submitted soils map represent a map developed by the Natural Resources Conservation Service?
Yes _____ No _____

If no, explain. If SCS map has been modified, explain (Example - photographically enlarged; soil map units recorrelated; area affected after initial mapping). Soil map scale must be 1" = 400' unless otherwise approved by the Department.

RESPONSE: N/A. *This application is to expand the shadow area. No surface disturbance is proposed.*

- B) Are any of the identified map units correlated as prime farmland by SCS criteria?
Yes _____ No _____

If yes, provide acreage by completing soil information chart.

RESPONSE: N/A. *This application is to expand the shadow area. No surface disturbance is proposed.*

- C) Submit, by completing soils information chart, acreage totals of each map unit (soil type and slope classification) and land use capability classes in the permit area and the percent slope range of each lettered slope classification used on the soil map.

RESPONSE: N/A. *This application is to expand the shadow area. No surface disturbance is proposed.*

- D) Indicate the average topsoil thickness of each of the soil map units to be affected. Locate on soils map the test holes for soil horizon thickness sampling. The topsoil replacement thickness (inches) will be _____.

RESPONSE: N/A. *This application is to expand the shadow area. No surface disturbance is proposed.*

- E) List the soil types and acreages of areas that will require the B and/or portions of the C horizon to be removed and replaced in order to establish the root medium necessary to achieve soil productivity consistent with the proposed post-mining land use.

Alternatively, a narrative description explaining why specific soil type acres information for reclamation plan achievement is not necessary may be provided instead.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

- F) Are selected overburden materials proposed to be used in lieu of or as a supplement to the A-horizon?

Yes _____ No _____

If yes, provide the appropriate information required under Section 1785.21(b). Also, identify source of the substitute materials and the topsoils to be substituted away from on a separate soils map unless the Department grants permission to describe the area in narrative form or to use the soils map provided in Part II 13(A). Explain why the proposed plan will provide the best available material of equal or better quality than present topsoil or surface existing material. This section must be addressed when re-affecting previously disturbed areas.

RESPONSE: *N/A. This application is to expand the shadow area. No surface disturbance is proposed.*

Dear Chad,

Hal Hassen, IDNR Archaeologist, and I reviewed the shadow boundary expansion area with you for Deer Run Mine, Montgomery County on December 3, 2014. The shadow boundary expansion area includes Panels 7 to 17 (P399, Shadow Boundary Rev. 2 map). We conducted a visual survey from the road of 21 properties to evaluate if the houses and barns warranted documentation prior to planned subsidence. Based on our preliminary survey, four structures will need additional documentation if the mine plans to proceed with demolition in the future. Each is listed below with attached photographs.

- | | | | |
|-------------------------------|-------------------|----------------------|-------------------------------------|
| • Phyllis Simonton | #5 on aerial map | Parcel 21-05-300-008 | b/w Panels 12 and 13 |
| • Jason Hustin | #6 on aerial map | Parcel 21-05-400-011 | Panel 14 |
| • Joel/Edward Thacker | #10 on aerial map | Parcel 21-09-400-012 | Panel 17, SE corner |
| • Craig Foster/
Pamela Ott | #13 on aerial map | Parcel 21-18-200-012 | South of Panel 17 in
buffer zone |

If you have questions, please feel free to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Dawn Cobb".
