

HFRA Administrative Rules: **Comment Index**

Introduction

When IDNR filed the first draft of the proposed rules in November of 2013, the Department anticipated the high level of public interest the rules would generate. To accommodate, IDNR provided multiple channels for the public to comment: five public hearings across the state, an online comment submission form, as well as regular mail and email options. The many ways for the public to comment meant that the comments vary considerably by format; for instance, the Department received documents ranging from handwritten letters and holiday cards to petitions, studies, and reports. To facilitate the review of the myriad comments received, IDNR used a numbering system to keep track of the comments.

In an effort to be as transparent as possible, this document includes a list of commenters and the comment number as applicable, to make it easier to locate the comments as posted on the Department's website. Many commenters raised multiple issues or concerns in one submission, while others provided individual submissions for each issue they identified. This made it more complex to state an exact number of "comments" received by the Department. However, we do know that IDNR staff reviewed more than 43,600 pages of material, representing close to 31,000 expressions of concern with the proposed rules.

The sections below describe the categories of comments received by IDNR over the comment period. Click the headings to be directed to that portion of the commenter list.

[Public Hearings \(Transcripts\)](#)

This list shows the names of the people who gave oral comments at the five public hearings: Chicago, Ina, Effingham, Decatur, and Carbondale. Over 1,000 people attended those hearings, at which approximately 160 persons presented 171 oral comments (some spoke more than once). The names and locations were compiled based on the information provided by the commenters. Commenters often spoke rapidly due to the limited time allotted, so the court reporters transcribed the testimony to the best of their ability. IDNR is aware of transcription mistakes but had numerous staff present and understood all statements.

[Fair Economy Illinois Comments \(Document Numbers: FE-1 to FE-14,266\)](#)

The Fair Economy Illinois ("FEI") coalition submitted a CD to IDNR with their comments. IDNR extracted those comments, put them in a more uniform format, and gave them separate numbers, so they could be identified and sorted throughout the review process. The attached list of commenters is in order of the comments as assembled by IDNR and posted on the website. Please note that there are many duplicates and missing locations, but this is how the comments were submitted to IDNR by FEI.

Online Comments (Document Numbers: 1-13,166)

In the past, IDNR has only accepted public comments on proposed rules through the mail, or through email to an attorney of the Department. For this rulemaking, due to the complexity of the issues involved, the interest statewide, and the anticipated high volume of comments, the Department also created a website where members of the public could submit a comment online. The goal of the website was to enable Illinoisans across the state to submit a comment for IDNR's consideration, even if they could not attend a public hearing or were unable to mail in a hard-copy comment. The website also encouraged and facilitated identifying a specific rule section and address, which saved time for IDNR in later sorting.

The Department received 13,166 submissions using the online form. The list of all persons and organizations that submitted comments appears next to the document number.

Please note that many pages appear to be missing content. This was because several external websites, designed and operated by other organizations, provided their own submission form for their members intended to be delivered to IDNR's website via script. However, the comment text on those third-party forms was not compatibly delivered to the IDNR database. Prior to and during the comment period, IT staff at IDNR tested the IDNR website and it continued to work as designed. IT staff at IDNR also identified the organizations from which comments were not delivered correctly, and made an effort to contact these organizations to alert them to the problem. IDNR recommended to these organizations to submit any electronic comments by CD-ROM. IDNR considered these incomplete comments as part of its analysis, but they are not included in the estimate of 31,000 mentioned above.

Written Comments Submitted to IDNR (Document Numbers: 13,167 – 22,740)

IDNR also accepted written comments on the proposed rules. These could be submitted by mail, email, or given to IDNR at a public hearing. Some were hand-delivered in bulk. The list of commenters is included, alongside the document number. Please note that the comments received came in many different formats: letters, petitions, studies, reports, holiday cards, etc. Many of the comments were handwritten, which made it more difficult to read. In addition, many commenters decided not to include a name or an address. As a result, IDNR staff compiled the list to the best of its ability considering the format of the comments.

CREDO Comments (Document Numbers: CR-1 to CR-5534)

The organization CREDO submitted a CD to IDNR with thousands of pages of comments from its members. Similar to the FEI comments, IDNR gave these comments a unique numbering system to facilitate the review and analysis of the comments. CREDO provided IDNR with a list of its members who submitted comments, so that was used to create this commenter list.

Given the volume, glitches in indexing and sorting are unavoidable; however, IDNR is also confident that every comment received was reviewed and given due consideration.
