FY22 Land and Water Report

On The Cover

The Hackmatack property of 76.835 acres, had been sought for the department since 2018.

The parcel is strategically located adjacent to significant McHenry County Conservation District holdings, and includes surviving stands of mature oaks and a portion of the Alden Sedge Meadow INAI Site #1262. In addition, nearly half of the site includes ADID wetlands considered biologically significant by the U.S. Army Corps of Engineers. The acquisition supports several elements of the Illinois Wildlife Action Plan.

The Alden Sedge Meadow INAI Site #1262 was recognized for the presence of high-quality graminoid fen and the presence of a number of State-listed species including grass pink orchid, Blanding's turtle, snake-mouth, pitcher plant, and common bog arrow grass. Of these, the Blanding's turtle is known from the Openlands Parcel.

Protection of this 76-acre parcel, located adjacent to Hackmatack National Wildlife Refuge, will further protect important ground water recharge zones upon which the high-quality graminoid fens at this site are dependent, protect a portion of the Alden Sedge Meadow INAI site, protect important nesting habitat for the Blanding's turtle, protect surviving mature oak stands and further protect the site from incompatible land use changes. Alden Sedge Meadow also serves as the headwaters of the North Branch of Nippersink Creek.

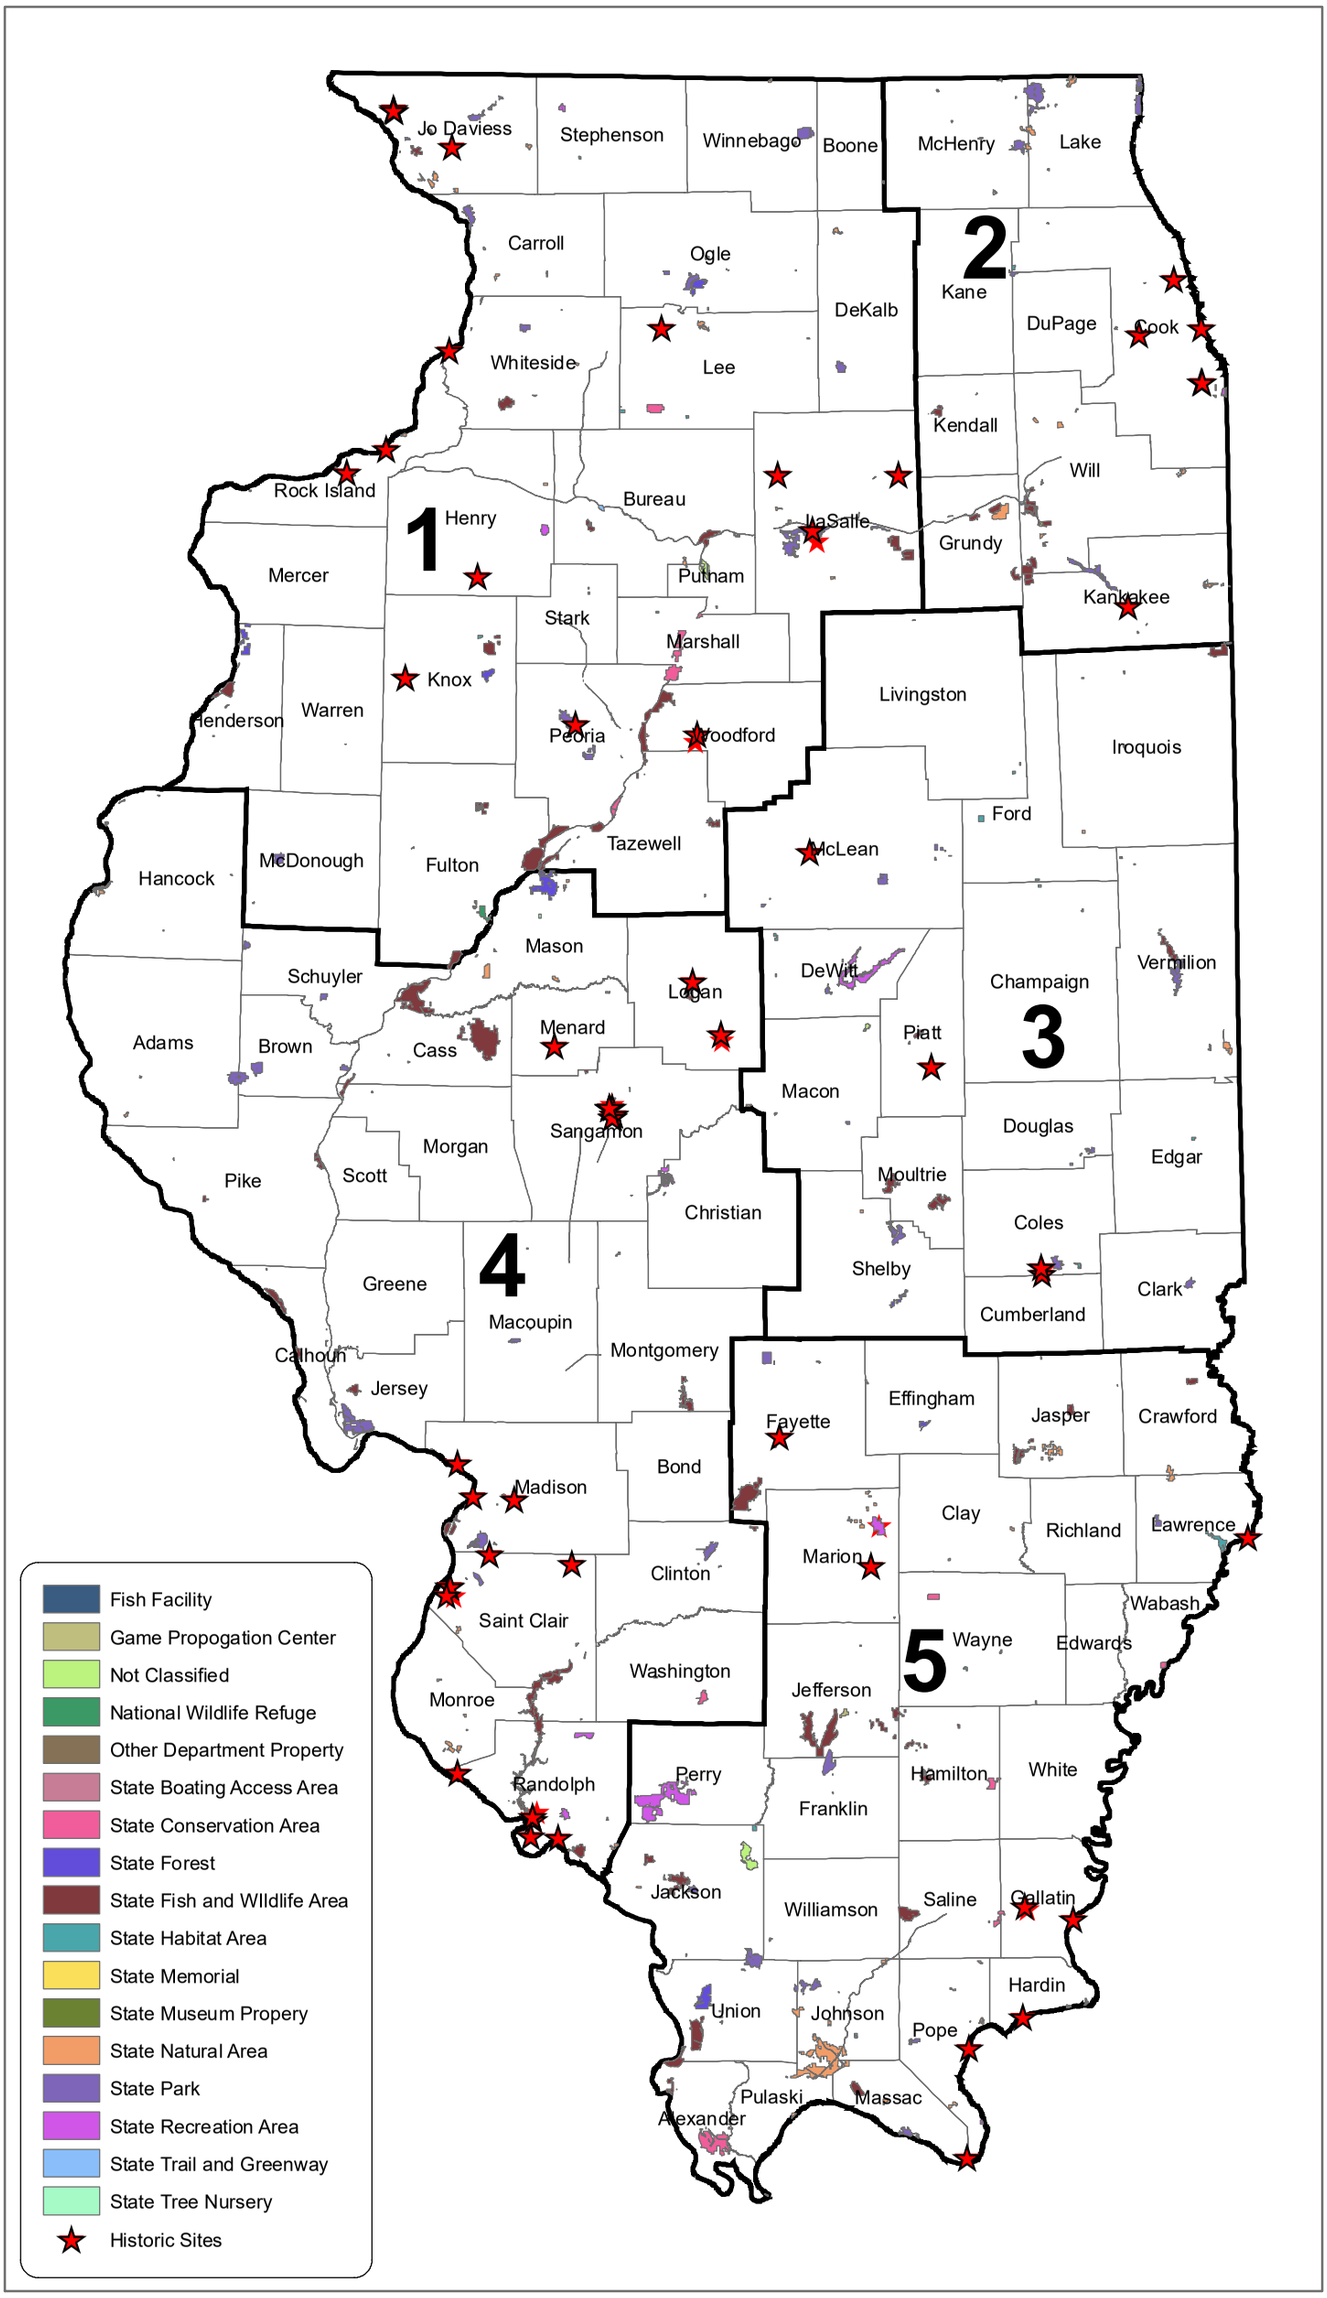

The parcel was purchased from Openlands using Natural Area Acquisition Funds.
