NPDES Pesticide Permits

Unless it is evident that there will be an adverse impact to a listed species or its essential habitat or to a Natural Area, including Nature Preserves and Land and Water Reserves, you do not have to consult for NPDES pesticide permits for the following actions:

- 1. Annual, routine cultivation of existing agricultural lands; and maintenance of existing lawns, yards and ornamental plantings.
- 2. Microbial larvicides applied to catch basins and storm sewers.
- **3.** Pesticides applied to artificial impoundments under 10 acres.
- 4. Pesticide applications within maintained road rights-of-way (ROW) that adjoin land used for agricultural or urban purposes, except those portions of the right-of-way adjacent to borrow pits, railroads, streams, wetlands, lakes, or other natural areas or open space. ROWs adjacent to a designated Nature Preserve or registered Land and Water Reserve are not exempt from review.
