**BOATING
ACCIDENT REPORT**

January 1, 2001 - December 31, 2001

A STATISTICAL SUMMARY OF THE REPORTABLE BOATING
ACCIDENTS IN THE STATE OF ILLINOIS FOR CALENDAR YEAR
2001

Illinois
Department of
Natural Resources

Illinois Boating Accident Report - 2001

While any boating related death is one too many, the statistics for the 2001 boating season are encouraging in that they show a dramatic decrease in the number of deaths. In 1996, twenty three people died in boating accidents. Numbers have gradually decreased since then but this is the first year for single digit numbers. This is encouraging as it indicates that it may reflect a trend toward safer boating practices. Perhaps the safe boating messages that have been taught by the hundreds of dedicated volunteer instructors coupled with literature, PSA's and pressures on industry to develop safer products are beginning to have a positive impact.

Statistics compiled by the Illinois Department of Natural Resources Office of Law Enforcement show a significant improvement in the accident, injury and fatality rate over the past six years.

	2001	2000	1999	1998	1997	1996
Deaths	8	14	13	19	14	27
Injuries	75	75	107	81	81	90
Accidents	112	155	159	176	146	155

Seven of the 8 people who died in boating accidents in Illinois last year were not wearing life jackets. Some accidents are not survivable due to extreme cold water, occurring far from shore or blunt trauma, but the chances of avoiding injury and surviving an accident are much greater if the boat operator and passengers are wearing life jackets. An analysis of the circumstances surrounding the seven individuals who died while not wearing life jackets indicates a strong possibility that they would have survived if they had been wearing them. Same old story but too many people think it could never happen to them. One unfortunate statistic this year is the increase in alcohol related deaths. Five people died in accidents in which alcohol abuse played a part as compared to only one last year.

The IDNR offers free boating safety courses to review boating laws and provide instruction on safe and attentive operation of watercraft. These courses are taught by dedicated, trained volunteers who are certified by the IDNR to teach safe boating classes. Many carry additional certification in boating safety instruction from the US Coast Guard Auxiliary or the US Power Squadrons. Course schedules are available by contacting the IDNR Safety Education Office at 800/832-2599, Ameritech Relay 800/526-0844, TDD 217/782-9175, or by checking the IDNR web site at dnr.state.il.us.

NARRATIVES

2001 Boat Accident Narratives

1. Two men drowned while crappie fishing on Rend Lake in Franklin County. The men were observed by a passing motorist in the water while their boat was circling them but they soon disappeared under the surface of the water before help could arrive. It is unknown what caused them to fall overboard but two theories are 1) they struck a submerged object, or 2) the operator let go of the tiller at full throttle allowing the motor to kick to one side causing a sudden change in direction. Neither subject was wearing a PFD. The accident occurred in March and the water temperature was only 44 degrees. Their bodies were found 17 days after the accident.

Cause of Accident: Unknown

Contributing Factors: Water temperature

Failure to wear PFD

2. A small 12', 38" wide, flat bottom jon boat was found circling in a small pond in McLean County. The pond was approximately 8' deep where the victim was recovered. The accident occurred in March and the surface temperature of the water was 53 degrees. There were empty beer bottles floating in the water near the boat and on shore. No PFDs were present or worn by the victim. It is unknown how the subject ended up in the water.

Cause of Accident: Unknown

Contributing Factors: Small, unstable boat

Water temperature

Possible alcohol - '03 report \Rightarrow BAC = .19 + metabolites of cannabis.

Failure to wear PFD

3. Two vessels collided at a high rate of speed at night on the Mississippi River in Mercer County. The victim was thrown from the boat and his body wasn't found for two weeks. The second operator was thrown from his boat but was able to swim to shore. It is unknown whether or not the victim was wearing a PFD. He was not wearing one when found. The second operator was charged with four felony counts of operation of a watercraft while under the influence of alcohol and misdemeanor counts of reckless operation of a watercraft and operating a watercraft while intoxicated. He pled guilty to felony OUI resulting in death and was sentenced to four years in the Illinois Department of Corrections. An autopsy of the victim revealed he had a BAC of .141.

Contributing Factors: Operating Under the Influence of Alcohol

Careless/Reckless Operation

Excessive Speed

Failure to wear PFD

4. Two passengers died when the vessel they were in hit its own wake after the operator made a sharp turn. The impact caused the vessel to turn sharply, throwing everyone out and into the river. The accident occurred on the Illinois River in Peoria County. The operator was arrested for OUI with a BAC greater than .08. Both of the victims had blood alcohol contents of .08 as well and were not wearing PFDs.

Contributing Factors: Operating Under the Influence of Alcohol
Careless Operation
Alcohol use by victims
Failure to wear PFD

5. Two vessels collided at night on the Fox River in McHenry County. A passenger in one of the vessels lost his arm when he was thrown through the windshield of the vessel. He died later in the hospital. Although the victim was not wearing a PFD, it did not contribute to his death. He died from the injuries sustained in the accident. The operator of the vessel was inexperienced and violated boating rules of the road.

Contributing Factors: Operator inexperience
Operator inattention
Rules of the road infraction.

6. Vessel 2 struck vessel 1 from behind on the Mississippi River in Rock Island County. The operator of vessel 2 crashed through the side of the boat as he was ejected from the boat. Although the victim sustained multiple injuries, the cause of death was drowning. Based on the investigation, it appears that the deceased attempted to pass vessel 1 at a high rate of speed known as a "fly by". Apparently he lost control of his boat in the wake of the other vessel causing the collision. The victim was not wearing a PFD. An autopsy revealed he had a BAC of .202, over twice the legal limit.

Contributing Factors: Operating Under the Influence of Alcohol
Careless/Reckless Operation
Excessive speed
Failure to wear PFD
