Application No. S20250140

PUBLIC NOTICE

**PROPOSED RELOCATION OF THE BUZZI UNICEM USA CAPTIVE CEMENT
UNLOADING BARGE AT RM 481 TO RM 481.35 ON THE MISSISSIPPI RIVER
IN ROCK ISLAND COUNTY**

Notice is hereby given to all interested parties that the Illinois Department of Natural Resources, Office of Water Resources (IDNR/OWR) has received an application from Buzzi Unicem USA to relocate the existing captive cement unloading barge located at RM 481 to RM 481.35 on the Mississippi River in section 34, township 18 North, range 2 West of the 4th Principal Meridian in Rock Island County. A location map is provided on the second page of this notice.

The agent indicates that the barge relocation will utilize 2 existing mooring spuds at the new location and will require the construction of a submerged steel anchor pile approximately 80ft upstream of the bow of the relocated barge. To ensure a riverbed elevation of 534 NAVD88 at the mooring site, the agent indicates that an estimated 498 cubic yards of sediment will need to be dredged from a 400 foot by 45 foot area and transported by barge to river front facility and trucked away for disposal. Additional construction will occur on the overbank to allow material removal by above ground pneumatic pipeline from the barge.

Inquiries may be directed to Kristian Peterson at 217/558-4532. All interested parties are invited to submit written statements regarding the proposed work to the Illinois Department of Natural Resources, Office of Water Resources, One Natural Resources Way, Springfield, Illinois 62702 by **August 19, 2026**.
